Experience

2008–present

Ana Hill Design Denver, CO

Along with print projects, I'm producing CMS-based Websites using WordPress. Working with Content Management Systems leaves me free to focus on what I do best: usability and information design. It's also a great way to create high-quality work on a tight budget.

2000–2008

National Jewish Health Denver, CO

National Jewish expected its print publications to reflect the hospital's reputation for excellence and innovation. The Design Studio was expected to do this on limited budgets. "Low budget," however, doesn't mean a monograph or brochure has to look cheap. We excelled at giving our clients distinctive, thoughtful designs with reasonable cost.

1998–2000

IXL Denver Denver, CO

It was a short ride, but I learned a lot from this rapidly-expanding, then rapidly-contracting, Internet agency, including teamwork and the value of innovative technologies.

1996–1997

Quark, Inc Denver, CO

At Quark I worked with a talented group of professional designers and developed excellent traditional design and production skills.

1995–1996

Contract work Denver, CO

Created marketing materials for various design studios in Denver, including the Denver Museum of Natural History, Archetype, and David Warren Design.

1988–1992

Peggy Miller Associates Washington, DC

In my first job as designer I produced reports and brochures for government agencies and non-profits. In Washington, DC, the print capital of the nation, my challenge was to compose compelling designs that ensured our clients' publications were noticed.

Education

Red Rocks Community College, Lakewood, CO Multimedia & Web, 1997 & 2009–2010

Corcoran School of Art, Washington, DC BFA, Graphic Design, May 1995

Trinity College, Hartford, CT BA, World History, May 1983

Capabilities

Employers have consistently appreciated my solid design skills, my love of new technologies, and my ability to listen to clients and adapt projects to their needs.
